

TECHIMPEX

Marine Cookers

MAXIMA

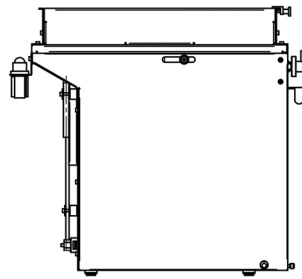

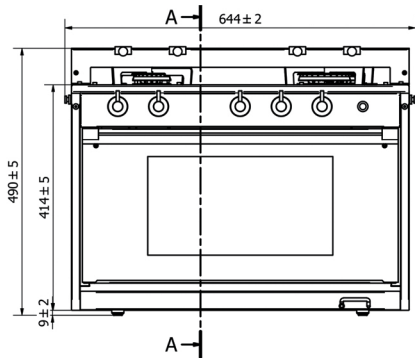

Our company houses a boutique laboratory, specializing in crafting innovative and exclusive gimbaling modules with a modern and minimalist design, tailored perfectly for today's cutting-edge vessels.

Our artisanal workshop has developed a range of high-end cookers in maxi sizes.

The modules are available with either 4 or 5 burners.

The ovens are spacious and come with powerful grills, electronic ignition, and double-pane glass doors.

ELECTRIC COOKERS WITH OVEN

Complete range of electric cookers. The cookers can be equipped with traditional static ovens or with multifunction microwave ovens.

HORIZON3 MICRO INDUCTION (1)

cooker with multifunction microwave oven and 3 induction cooking zones
detachable panholders, exclusive gimball adjusters -
Max power 6,6 kW (4,2kW with PMS) - 53w (w.gimbals) x 59d x 49h cm

HORIZON2 MICRO COMPACT (2)

cooker with multifunction microwave oven and 2 radiant cooking zones
detachable panholders, exclusive gimball adjusters -
Max power 3,8 kW - 48w (w.gimbals) x 44d x 44h cm

HORIZON2 and HORIZON2 COMPACT (3)

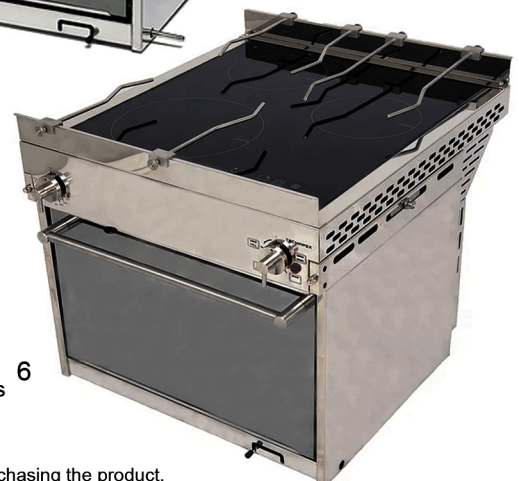

cooker with electric oven and 2 radiant cooking zones
detachable panholders, exclusive gimball adjusters -
Max power 4,1 kW - 53w (w.gimbals) x 46d x 48h cm (standard version)
Max power 4,1 kW - 48w (w.gimbals) x 42d x 44h cm (compact version)

HORIZON4 (4)

cooker with electric oven and 4 radiant cooking zones
detachable panholders, exclusive gimball adjusters -
Max power 7,7 kW - 53w (w.gimbals) x 58d x 48h cm

HORIZON4 INDUCTION (5)

cooker with electric oven and 4 induction cooking zones
detachable panholders, exclusive gimball adjusters -
Max power 8,9 kW (4,5 with PMS) - 70w (w.gimbals) x 58d x 52h cm

HORIZON3 INDUCTION (6)

cooker with electric oven and 3 induction cooking zones, detachable panholders, exclusive gimball adjusters
Max power 6,7 kW (min 4,3 kW with PMS)- 53w (w.gimbals) x 58d x 52h cm

ECOBBQ - WOODEN PELLET BARBECUE

Patented system

INNOVATIVE **WOODEN PELLET** BARBECUE - SUPERCOMPACT DESIGN

No electrical power, charcoal or gas is required.

The barbecue is ready to use in just a few minutes. Super easy lighting.

No smoke and the remaining very little dust can be used as organic waste

Burner capacity = 0,8 kg

Duration 1,2 Hours

Extremely powerful (temperature of the plancha plate can reach more than 450°C)

Robust thick stainless steel structure and enamelled plancha

Optional grill rail mount

Optional stainless steel lid with air vent

44 w x 27,5 d 32,5 h cm

GREEN COMBUSTION

THE FIRST MARINE ECO FRIENDLY GRILL

Clean-burning

Pellet burning produces far fewer emissions than any other fuel!

The most innovative cooking system available

NEWS

THE FIRST MARINE PELLET BARBECUE GRILL WITH JUST A FEW CENTS (0,8 KG PELLET = MORE THAN 1 HOUR DURATION!!)
The very small amount of pellets used, means extremely low operating costs (and this also saves space for fuel storage onboard - for ex. a fraction of the space needed for charcoal).

TECHIMPEX marinecookers

TECHIMPEX marinecookers

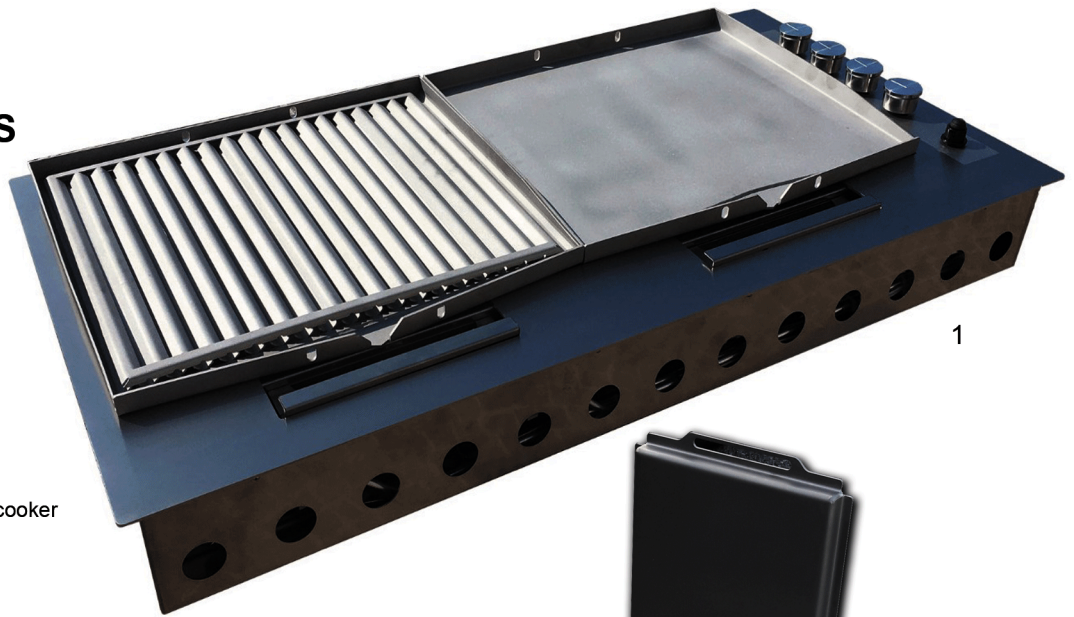

www.techimpex.it

BUILT IN GLASS CERAMIC ELECTRIC HOBS

Electric radiant or induction hobs with 1,2,3,4 (5,6 and more) zones

INDUCTION HOBS are equipped with an electronic system (ES) which permits to limit the power of the whole hob to a mere 2,8 kW !

CRYSTAL4 INDUCTION (1)

hob with 4 cooking zones
Max power 7,2 kW (2,8 kW ES) 58w x 51d cm

CRYSTAL3 INDUCTION (2)

hob with 4 cooking zones
Max power 5,2 kW (2,8 kW ES) - 44w x 51d cm

CRYSTAL2 INDUCTION (3)

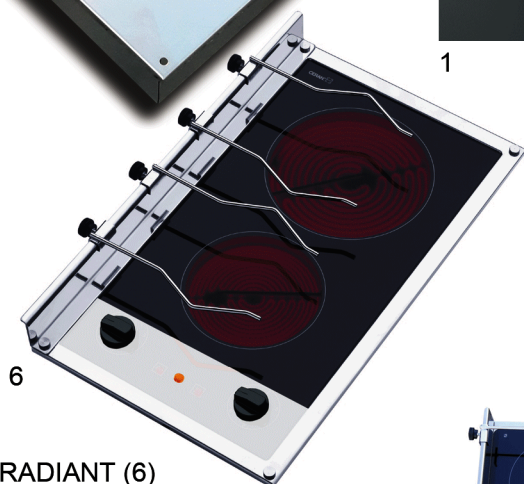

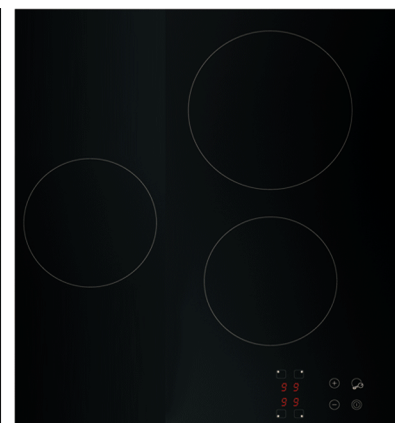

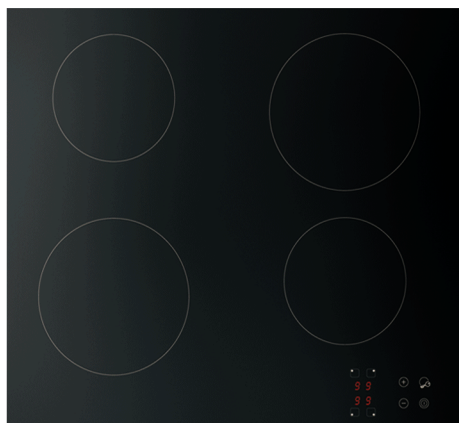

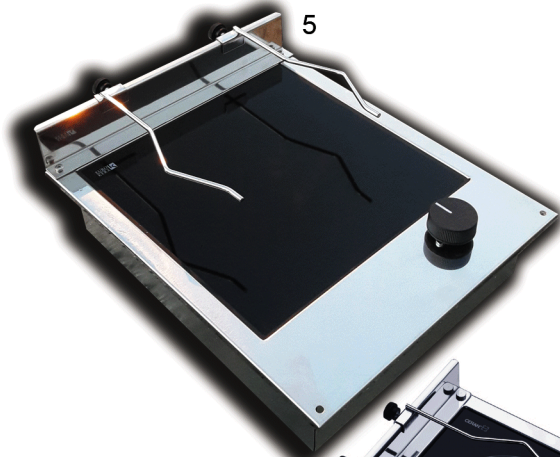

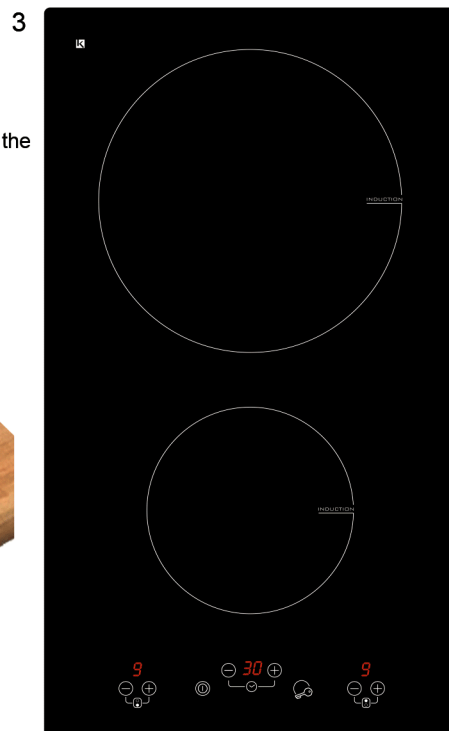

hob with 4 cooking zones
Max power 3,6 kW (2,8 kW ES) - 29w x 51d cm

PANHOLDERS (4)

All hobs can be supplied with different models of patented panholders to be fixed on the furniture near the hobs or directly attached to the hobs stainless steel frames (see radiant hobs below).

CRYSTAL1 RADIANT (5)

hob with 1 cooking zone
Max power 1,2 kW - 50/60 Hz 230 or 110V - 30w x 30d cm

CRYSTAL2 RADIANT (6)

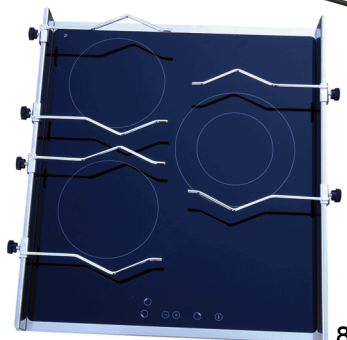

hob with 4 cooking zones, panholders
Max power 3,0 kW - 50/60 Hz 230 or 110V - 30w x 51.9d x 46h cm

CRYSTAL4 RADIANT (7)

hob with 4 cooking zones, panholders
Max power 6,0 kW - 50/60 Hz 230 or 110V - 51,7w x 58,7d cm

CRYSTAL3 RADIANT (8)

hob with 3 cooking zones, panholders
Max power 4,7 kW - 50/60 Hz 230 or 110V - 46,2w x 50.8d cm

* All dimensions, datas, images are approximate. Please ask for drawings and technical data sheets before purchasing the product.

Only a few models are represented in this leaflet. **MANY MORE MODELS INCLUDING CUSTOM MODELS ARE AVAILABLE.** Check our website and contact us for more info.

TECHIMPEX marinecookers

www.techimpex.it

BUILT IN GLASS CERAMIC ELECTRIC HOBS

Induction hobs with 2,4 (and more) zones with POWER SYSTEM CONTROL (PS)

INDUCTION HOBS are equipped with an electronic system (PS) which permit to control the power of the cooking areas in such way that the power absorbed in amps is effectively controlled directly from the user. For example if the cooking zone is set at the min the absorption is just a few hundred watts.

CRYSTAL2 INDUCTION PS (1)

hob with 4 cooking zones - BRIDGE FUNCTION (2 zones can be connected)
Max power 3,7 kW - 58w x 51d cm

CRYSTAL4 INDUCTION PS (2)

hob with 4 cooking zones - BRIDGE FUNCTION (2 zones can be connected)
Max power 6,7 kW - 58w x 51d cm

PANHOLDERS (3)

All hobs can be supplied with different models of patented panholders to be fixed on the furniture near the hobs or on request directly attached to the hobs stainless steel optional frames

INDUCTION HOBS WITH INTEGRATED HOOD

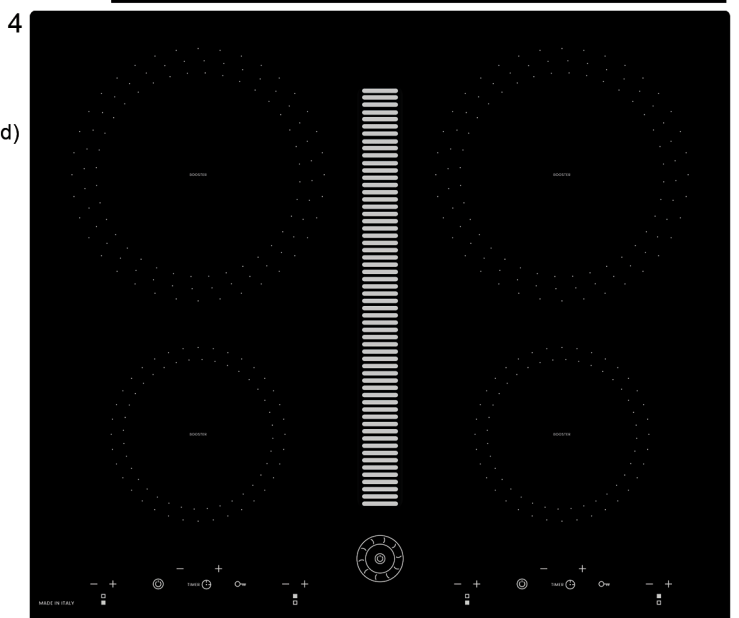

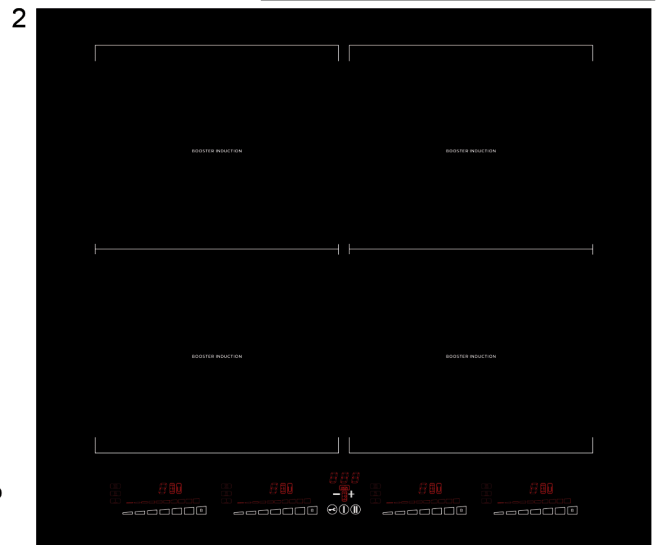

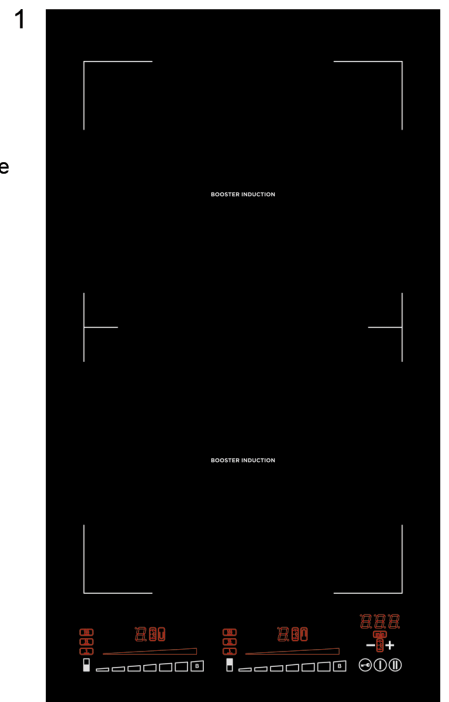

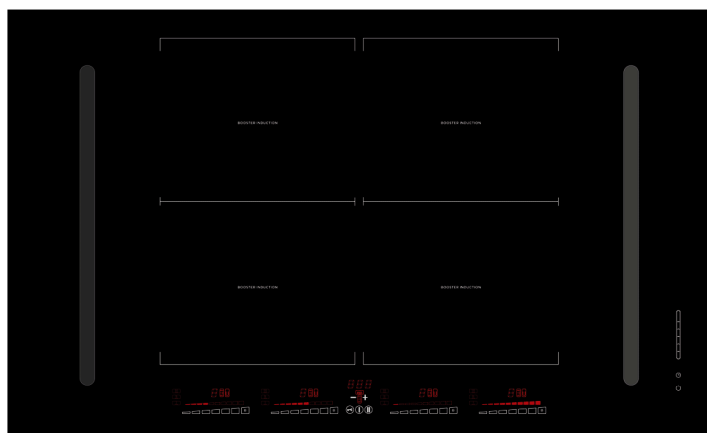

These hobs are equipped with a special electronic system (PS) to limit the power use (see above) and also with a patented hood. No more need to install separated hoods. Simplified installation.

CRYSTAL4 INDUCTION PS CENTRAL HOOD(4)

hob with 4 cooking zones
Max power 7,4 kW - 58w x 51d cm

CRYSTAL4 INDUCTION PS SIDES HOOD(5)

hob with 4 cooking zones - BRIDGE FUNCTION (2 zones can be connected)
Max power 6,8 kW - 83w x 51d cm

* All dimensions, datas, images are approximate. Please ask for drawings and technical data sheets before purchasing the product.

Only a few models are represented in this leaflet. **MANY MORE MODELS INCLUDING CUSTOM MODELS ARE AVAILABLE.** Check our website and contact us for more info.

Virtus | Raffaello

We've brought to life an extraordinary product, a true culinary innovation.

Our inspiration? A passion for cooking, because we are Italians, and a love for high-quality food.

We've pushed the boundaries, creating something truly revolutionary, an authentic game changer. When the surface is sealed flawlessly onto the countertop, the cooktop becomes perfectly watertight. On a boat, this feature becomes absolutely essential.

But that's not all. The ability to adjust the temperature to over 500°C not only allows you to grill directly on the glass but also to cook with pots, opening up new culinary horizons. The efficiency is extraordinary; when it comes to grilling, it can even surpass induction systems.

The design is elegant and minimalist, seamlessly blending with the aesthetics of modern boats.

Cleaning is a breeze, thanks to the glass that's practically impervious to bacterial retention. This means our product is much more hygienic than other barbecues, often a nightmare to clean, if not impossible to sanitize.

Moreover, flavors never mix, as the glass retains nothing. Our system is incredibly fast and powerful, guaranteeing unmatched cooking results. And there's another ace up our sleeve: unlike traditional systems, our insulated resistors are practically immune to the wind, solving a common problem with many traditional barbecues.

It's time to change the game in the galley and embrace innovation with our unique product. The culinary experience will never be the same again!

Abbiamo dato vita a un prodotto straordinario, una vera innovazione culinaria. La nostra ispirazione? La passione per la cucina, perché siamo italiani, e l'amore per il cibo di qualità.

Ci siamo spinti oltre, creando qualcosa di veramente rivoluzionario, un autentico game changer. Quando il nostro piano viene sigillato in modo impeccabile sulla superficie, il piano cottura diventa ermeticamente perfetto. Su una imbarcazione, questa caratteristica diventa cruciale.

Ma non è tutto qui. La capacità di regolare la temperatura fino a oltre 500°C non solo consente di grigliare direttamente sul vetro, ma anche di cucinare con le pentole, aprendo nuovi orizzonti culinari. L'efficienza è straordinaria; quando si tratta di grigliare, può persino superare i sistemi a induzione. Il design è elegante e minimalista, si fonde armoniosamente con l'estetica delle moderne imbarcazioni.

La pulizia è un gioco da ragazzi, grazie al vetro praticamente immune alla ritenzione batterica. Questo significa che il nostro prodotto è molto più igienico rispetto ad altri barbecue, spesso un incubo da pulire, se non impossibili da igienizzare. Inoltre, i sapori non si mescolano mai, poiché il vetro non trattiene nulla. Il nostro sistema è incredibilmente veloce e potente, garantendo risultati di cottura ineguagliabili. E c'è un altro asso nella manica: a differenza dei sistemi tradizionali, le nostre resistenze isolate sono praticamente protette dal vento, risolvendo un problema comune a molti barbecue tradizionali di bordo.

È arrivato il momento di cambiare le regole del gioco in cucina e abbracciare l'innovazione con il nostro prodotto unico. L'esperienza culinaria non sarà mai più la stessa!

VICTOR | FORTIS

Victor (Teppan Yaki) e Fortis (Griddle) sono i primi grill di altissima pensata specificatamente per la nautica.

I primi ad essere realizzati con chassis in acciaio inox marino e sealed handles.

Perfino la griglia di cottura (nel caso di Fortis) viene realizzata con uno speciale materiale resistente alle intemperie e con un trattamento superficiale esclusivo antiaderente di altissimo livello qualitativo.

Le cornici sono realizzate in acciaio inox marino di forte spessore (ben 3 mm!).

Completano questa gamma gli speciali paraventiparafiamma perimetrali opzionali.

Victor (Teppan Yaki) and Fortis (Griddle) are the first high-end grills specifically designed for marine use.

They are the first to be constructed with a marine-grade stainless steel chassis and sealed handles.

Even the cooking grates (in the case of Fortis) are made from a special weather-resistant material and feature a top-quality, exclusive non-stick surface treatment.

The frames are crafted from heavy-duty marine-grade stainless steel (a robust 3 mm thickness!).

Completing this range are the optional special perimeter windshields and flame guards.
